# **ANAPHYLAXIS AND ALLERGIC REACTIONS**

QUALITY AREA 2 | ELAA version 1.1

This policy was reviewed by Australasian Society of Clinical Immunology and Allergy, Allergy & Anaphylaxis Australia Inc. For more information visit

https://www.nationalallergystrategy.org.au/

#### **PURPOSE**

This policy provides guidelines Brentwood Preschool to:

- minimise the risk of an allergic reaction including anaphylaxis occurring while children are in the care of Brentwood Preschool
- ensure that service staff respond appropriately to allergic reactions including anaphylaxis by following the child's ASCIA Action Plan for Anaphylaxis and ASCIA Action Plan for Allergic Reactions
- raise awareness of allergies and anaphylaxis and appropriate management amongst all at the service through education and policy implementation.
- working with parents/guardians of children with either an ASCIA Action Plan for Anaphylaxis or ASCIA Action Plan for Allergic Reactions in understanding risks and identifying and implementing appropriate risk minimisation strategies and communication plan to support the child and help keep them safe.

This policy should be read in conjunction with the Dealing with Medical Conditions Policy and Incident, Injury, Trauma and Illness Policy.

#### **POLICY STATEMENT**

#### **VALUES**

BRENTWOOD PRESCHOOL BELIEVES THAT THE SAFETY AND WELLBEING OF CHILDREN WHO HAVE ALLERGIC REACTIONS AND/OR ARE AT RISK OF ANAPHYLAXIS IS A WHOLE-OF-COMMUNITY RESPONSIBILITY, AND IS COMMITTED TO:

- ensuring that every reasonable precaution is taken to protect children harm and from any hazard likely to cause injury
- providing a safe and healthy environment in which children at risk of anaphylaxis can participate fully in all aspects of the program
- raising awareness amongst families, staff, children and others attending the service about allergies and anaphylaxis
- actively involving the parents/guardians of each child at risk of anaphylaxis in assessing risks, and in developing appropriate risk minimisation and risk management strategies for their child
- ensuring all staff members and other adults at the service have adequate knowledge of allergies, anaphylaxis and emergency procedures
- facilitating communication to ensure the safety and wellbeing of children at risk of anaphylaxis.

### **SCOPE**

This policy applies to the approved provider, persons with management or control, nominated supervisor, persons in day-to-day charge, early childhood teachers [ECT], educators, staff, students, volunteers,

parents/guardians, children, and others attending the programs and activities of Brentwood Preschool, including during offsite excursions and activities.

This policy will apply regardless of whether a child diagnosed by a registered medical practitioner as being at risk of anaphylaxis is enrolled at the service.

RESPONSIBILITIES	Approved provider and persons with management or control	Nominated supervisor and persons in day-to-day charge	Early childhood teacher, educators and all other staff	Parents/ guardians	Contractors, volunteers and students
R inc	licates legislation	requirement, and	should not be de	leted	
Ensuring that an anaphylaxis policy, which meets legislative requirements (Regulation 90) and includes a medical management plan (refer to Definitions), risk minimisation plan (refer to Definitions) (refer to Attachment 3) and communication plan (refer to Definitions), is developed and	R	V			
displayed at the service, and					
reviewed annually  Providing approved anaphylaxis management training (refer to Sources) to staff as required under the National Regulations	R	٧			
Ensuring that at least one ECT/educator with current (within the previous 3 years) approved anaphylaxis management training (refer to Definitions) is in attendance and immediately available at all times the service is in operation (Regulations 136, 137)	R	V			
Note: this is a minimum requirement, ELAA recommends that ALL educators have current approved first aid qualifications, anaphylaxis management training and asthma management training.					
Ensuring that all ECT/educators approved first aid qualifications, anaphylaxis management training (refer to Sources) and emergency asthma management training are	R	٧			

current (within the previous 3				
years), meet the requirements				
of the National Act (Section				
169(4)) and National				
Regulations (Regulation 137),				
and are approved by ACECQA				
(refer to Sources)				
Providing opportunities for				
ECT/Educators to undertake				
food allergen management	٧	٧		
training (refer to Sources)				
Develop an anaphylaxis				
emergency response plan which				
follows the ASCIA Action Plan				
(refer to Attachment 4) and				
identifies staff roles and				
responsibilities in an				
anaphylaxis emergency.	٧	٧	٧	V
Emergency response plans				
should be practised at least				
once a year. Separate				
emergency response plans must				
be developed for any off-site				
activities				
Ensuring ECT/educators and				
staff are aware of the				
procedures for first aid	R	٧	٧	
treatment for anaphylaxis (refer

# **RISK ASSESSMENT**

The National Law and National Regulations do not require a service to maintain a stock of adrenaline injectors at the service premises to use in an emergency. However, ELAA recommends that the approved provider undertakes a risk assessment in consultation with the nominated supervisor and other educators, to inform a decision on whether the service should carry its own supply of these devices. This decision will also be informed by considerations such as distance to the nearest medical facility and response times required for ambulance services to reach the service premises etc.

If the approved provider decides that the service should maintain its own supply of adrenaline autoinjectors, it is the responsibility of the approved provider to ensure that:

adequate stock of the adrenaline autoinjector is on hand, and that it is unused and in date appropriate procedures are in place to define the specific circumstances under which the device supplied by the service will be used

the autoinjector is administered in accordance with the written instructions provided on it and with the generic ASCIA action plan for anaphylaxis

the service follows the procedures outlined in the Administration of Medication Policy, which explains the steps to follow when medication is administered to a child in an emergency parents/guardians are informed that the service maintains a supply of adrenaline autoinjectors, of the brand that the service carries and of the procedures for the use of these devices in an emergency

#### **BACKGROUND AND LEGISLATION**

# **BACKGROUND**

Anaphylaxis is a severe and life-threatening allergic reaction. Allergies, particularly food allergies are common in children. The most common causes of allergic reaction in young children are foods, bee or other insect stings, and some medications. A reaction can develop within minutes of exposure to the allergen and young children may not be able to identify or communicate the symptoms of anaphylaxis. With planning and training, many reactions can be prevented, however when a reaction occurs, good planning, training and communication can ensure the reaction is treated effectively by using an adrenaline injector (EpiPen® or Anapen®).

In any service that is open to the general community, it is not possible to achieve a completely allergen-free environment. A range of procedures and risk minimisation strategies, including strategies to minimise exposure to known allergens, can reduce the risk of allergic reactions including anaphylaxis.

Legislation that governs the operation of approved children's services is based on the health, safety and welfare of children, and requires that children are protected from hazards and harm. The approved provider will ensure that there is at least one educator on duty at all times who has current approved anaphylaxis management training in accordance with the *Education and Care Services National Regulations 2011* (Regulation 136(1) (b)). As a demonstration of duty of care and best practice, ELAA recommends all educators have current approved anaphylaxis management training (refer to Definitions).

Approved anaphylaxis management training is listed on the ACECQA website (*refer to Sources*). This includes ASCIA anaphylaxis e-training for Australasian children's education and care services, which is an accessible, evidence-based, best practice course that is available free of charge. The ASCIA course is National Quality Framework (NQF) approved by ACECQA for educators working in ECEC services.

# **LEGISLATION AND STANDARDS**

Relevant legislation and standards include but are not limited to:

- Education and Care Services National Law Act 2010: Sections 167, 169
- Education and Care Services National Regulations 2011: Regulations 90–96, 102, 136, 137, 146, 147, 160–162, 168(2)(d), 173, 177, 181, 183, 184.
- Health Records Act 2001 (Vic)
- National Quality Standard, Quality Area 2: Children's Health and Safety
- Occupational Health and Safety Act 2004 (Vic)
- Occupational Health and Safety Regulations 2017
- Privacy and Data Protection Act 2014 (Vic)
- Privacy Act 1988 (Cth)
- Public Health and Wellbeing Act 2008 (Vic)
- Public Health and Wellbeing Regulations 2009 (Vic)

The most current amendments to listed legislation can be found at:

Victorian Legislation – Victorian Law Today: <a href="www.legislation.vic.gov.au">www.legislation.vic.gov.au</a>
Commonwealth Legislation – Federal Register of Legislation: <a href="www.legislation.gov.au">www.legislation.gov.au</a>

# **DEFINITIONS**

The terms defined in this section relate specifically to this policy. For regularly used terms e.g. Approved provider, Nominated supervisor, Notifiable complaints, Serious incidents, Duty of care, etc. refer to the Definitions file of the PolicyWorks catalogue.

Adrenaline injector: An intramuscular injection device containing a single dose of adrenaline designed to be administered by people who are not medically trained. Two brands of adrenaline injectors are currently available in Australia - EpiPen® or an Anapen®. As EpiPen® and Anapen® products have different administration techniques, only one brand should be prescribed per individual and their ASCIA Action Plan for Anaphylaxis (refer to Definitions) must be specific for the brand they have been prescribed. Staff should know how to administer both brands of adrenaline injectors.

Used adrenaline injectors should be placed in a hard plastic container or similar and given to the paramedics. Or placed in a rigid sharps disposal unit or another rigid container if a sharps container is not available.

Adrenaline injector kit: An insulated container with an unused, in-date adrenaline injector, a copy of the child's ASCIA Action Plan for Anaphylaxis, and telephone contact details for the child's parents/guardians, doctor/medical personnel and the person to be notified in the event of a reaction if the parents/guardians cannot be contacted. If prescribed, an antihistamine should also be included in the kit. Adrenaline injectors must be stored away from direct heat and cold.

**Allergen:** A substance that can cause an allergic reaction.

**Allergy**: An immune system response to something in the environment which is usually harmless, e.g.: food, pollen, dust mite. These can be ingested, inhaled, injected or absorbed. Almost always, food needs to be ingested to cause a severe allergic reaction(anaphylaxis) however, measures should be in place for children to avoid touching food they are allergic to.

**Allergic reaction:** A reaction to an allergen. Common signs and symptoms include one or more of the following:

- Mild to moderate signs & symptoms:
  - hives or welts

- o tingling mouth
- o swelling of the face, lips & eyes
- o abdominal pain, vomiting and/or diarrhoea are mild to moderate symptoms; however, these are severe reactions to insects.
- Signs & symptoms of anaphylaxis are:
  - difficult/noisy breathing
  - o swelling of the tongue
  - swelling/tightness in the throat
  - o difficulty talking and/or hoarse voice
  - o wheeze or persistent cough
  - persistent dizziness or collapse (child pale or floppy).

Anapen®: A type of adrenaline injector (refer to Definitions) containing a single fixed dose of adrenaline. The administration technique in an Anapen® is different to that of the EpiPen®. Three strengths are available: an Anapen® 250 and an Anapen® 300 and Anapen® 500, and each is prescribed according to a child's weight. The Anapen® 150 is recommended for a child weighing 7.5–20kg. An Anapen® 300 is recommended for use when a child weighs more than 20kg and Anapen® 500 may be prescribed for teens and young adults over 50kg. The child's ASCIA Action Plan for Anaphylaxis (refer to Definitions) must be specific for the brand they have been prescribed (i.e. Anapen® or EpiPen®).

**Anaphylaxis:** A severe, rapid and potentially life-threatening allergic reaction that affects normal functioning of the major body systems, particularly the respiratory (breathing) and/or circulation systems.

**Anaphylaxis management training:** Training that includes recognition of allergic reactions, strategies for risk minimisation and risk management, procedures for emergency treatment and facilitates practise in the administration of treatment using an adrenaline autoinjector (*refer to Definitions*) trainer. Approved training is listed on the ACECQA website (*refer to Sources*).

ASCIA Action Plan for Anaphylaxis/Allergic Reactions: A standardised emergency response management plan for anaphylaxis prepared and signed by the child's treating, registered medical or nurse practitioner that provides the child's name and confirmed allergies, a photograph of the child, a description of the prescribed anaphylaxis medication for that child and clear instructions on treating an anaphylactic episode. The plan must be specific for the brand of adrenaline injector prescribed for each child. Examples of plans specific to different adrenaline injector brands are available for download on the Australasian Society of Clinical Immunology and Allergy (ASCIA) website: <a href="https://www.allergy.org.au/hp/anaphylaxis/ascia-action-plan-for-anaphylaxis">https://www.allergy.org.au/hp/anaphylaxis/ascia-action-plan-for-anaphylaxis</a>

At risk child: A child whose allergies have been medically diagnosed and who is at risk of anaphylaxis.

**EpiPen®:** A type of adrenaline injector (*refer to Definitions*) containing a single fixed dose of adrenaline which is delivered via a spring-activated needle that is concealed until administration is required. Two strengths are available: an Epipen® and an Epipen Jr®, and each is prescribed according to a child's weight. The Epipen Jr® is recommended for a child weighing 10–20kg. An Epipen® is recommended for use when a child weighs more than 20kg. The child's ASCIA Action Plan for anaphylaxis (*refer to Definitions*) must be specific for the brand they have been prescribed.

**First aid management of anaphylaxis course**: Accredited training in first aid management of anaphylaxis including competency in the use of an adrenaline autoinjector.

**Intolerance:** Often confused with allergy, intolerance is an adverse reaction to ingested foods or chemicals experienced by the body but not involving the immune system.

**No food sharing:** A rule/practice in which a child at risk of anaphylaxis only eats food that is supplied/permitted by their parents/guardians and does not share food with, or accept food from, any other person.

**Nominated staff member:** (In relation to this policy) a staff member nominated to be the liaison between parents/guardians of a child at risk of anaphylaxis and the approved provider. This person also checks regularly to ensure that the adrenaline injector kit (*refer to Definition*) is complete and that the device itself is unused and in date and leads practice sessions for staff who have undertaken anaphylaxis management training.

#### **EVALUATION**

In order to assess whether the values and purposes of the policy have been achieved, the approved provider will:

- selectively audit enrolment checklists (for example, annually) to ensure that documentation is current and complete
- regularly seek feedback from everyone affected by the policy regarding its effectiveness
- monitor the implementation, compliance, complaints and incidents in relation to this
  policy
- keep the policy up to date with current legislation, research, policy and best practice
- revise the policy and procedures as part of the service's policy review cycle or following an anaphylactic episode at the service, or as otherwise required
- notifying all stakeholders affected by this policy at least 14 days before making any significant changes to this policy or its procedures, unless a lesser period is necessary due to risk (Regulation 172 (2)).
